

Minji Jung

JUNIOR, DEPARTMENT OF ARTIFICIAL INTELLIGENCE, YONSEI UNIVERSITY

✉ mjjung23@yonsei.ac.kr | [📷 mjxjung](#)

Education

Yonsei University

B.S. IN ARTIFICIAL INTELLIGENCE

- GPA: 3.74 / 4.3 (Overall)

Seoul, S.Korea

Mar. 2023 - Expected Feb. 2027

Research Interests

- Large Language Models (LLMs):** reliability, adaptation, and tool-use, with a focus on using LLMs as core reasoning modules for agent systems.
- Agent Systems:** LLM-driven single- and multi-agent architectures, including protocol-based coordination and planning.

Honors & Awards

2025 **Gold Prize, Yonsei 3rd GenAI Competiton**

among 12 Finalist Teams, by Yonsei University

Seoul, S.Korea

2025 **Excellence Award (ETRI President Award), 2025 KoMaP AI Competition**

by the Ministry of Trade, Industry and Energy (MOTIE) and KIAT, organized by ETRI, KRICT, and KICET

Seoul, S.Korea

2025 **Excellence Award, 2025 LLM Query Hackathon**

Top 3 among 8 Finalists, by Yonsei University, YBIGTA, and Upstage

Seoul, S.Korea

2025 **Departmental Honors Scholarship, AI-Business Convergence (Advanced Major)**

by the Department of Artificial Intelligence, Yonsei University

Seoul, S.Korea

Experience

Yonsei Big Data Club (YBIGTA)

EDUCATION COMMITTEE MEMBER

Seoul, S.Korea

Jan. 2025 - PRESENT

- Designed / graded onboarding assignments for cohort 27; facilitated weekly sessions.
- NLP / CV Paper Reading: conducted structured weekly studies covering the LLM stack (tokenization, representations, transformers, fine-tuning, and reasoning) and its extensions to vision and generative models (e.g., CNNs, diffusion, VLMs), and led discussions.
- Presented and discussed generative modeling papers including Latent Diffusion Models and DiT.

Course & Personal projects

Day vs. Night Classification (Individual) [📄 GitHub](#)

Seoul, S.Korea

MINI AI PIPELINE (COURSE PROJECT)

Dec 2025

- Designed an end-to-end image classification pipeline to distinguish day vs. night scenes.
- Implemented a naïve brightness-threshold baseline and compared it with a zero-shot CLIP model.
- Collected new dataset and conducted quantitative and qualitative evaluation, and analyzed failure cases of both methods.

ResearchAgent — YBIGTA Summer Project (Team) [📄 GitHub](#)

Seoul, S.Korea

AI-DRIVEN POKÉMON CARD GENERATOR

Aug. 2025

- Built an LLM-driven agentic pipeline for automatic Pokémon card concept generation, evaluation, and refinement, inspired by agentic tree search frameworks (e.g., The AI Scientist).
- Contribution:** Designed the agent card generation part, and aligned output with structured specifications with visual card generation.

MoMuGo — Yonsei Big Data Club (Team) [📄 GitHub](#)

Seoul, S.Korea

LOCAL RESTAURANT RECOMMENDER (RAG)

Feb. 2024

- Built an NLP-driven local restaurant recommender, matching user queries to restaurants via semantic search.
- Contribution:** Designed the ETL pipeline, implemented query parsing and semantic search up to the pre-RAG stage.

KINI — RC Creative Platform (Nexon Korea sponsored, Team)

Seoul, S.Korea

COMMUNITY DELIVERY WEB APP

Apr. 2023 - Nov. 2023

- Built a community delivery web app for aging towns, with user flow and UX tailored for elderly accessibility.
- Contribution:** Implemented frontend and backend-integrated features (e.g., shopping cart) using React and Firebase.

Extracurricular Activity

AGI Agent Hackathon 2025	Seoul, S.Korea
PARTICIPANT	2025
• Prototyped agentic workflow using UPSTAGE Document Parse and Information Extract APIs.	
Yonsei Computer Club (YCC)	Seoul, S.Korea
MEMBER	Aug, 2023 - PRESENT
• Studies: n8n (25-2), C / C++ (25-1), React (24-1), Figma (23-2).	
AI Band Club (ABC)	Seoul, S.Korea
VOCAL	Aug, 2023 - PRESENT
• Performed as main / backup vocal (23-2); Band's first solo concert participation.	

Skills

Programming	C, C++, Python, Web programming languages (HTML, CSS, React), MATLAB, SQL
Tools	Figma, Git
Languages	Korean: Native, English: Proficient (TOEIC 980 / 990)
Hobbies	Watching movies, Singing karaoke, Reading books
